PROJECTS

SchedRx – SaaS Doctor Appointment Platform (React, Node.js, Express, MongoDB) — Mar 2024

- Engineered a 3-tier SaaS booking platform with secure multi-role authentication (patients, doctors, admins).
- Built dashboards for patients (book/manage appointments), doctors (schedules and earnings), and admins (system control).
- Improved scheduling efficiency and reduced appointment management errors by 30

EternaCart – E-Commerce Platform (MERN Stack) — Oct 2024

- Developed authentication, product catalog, filtering, and cart/checkout system with order management.
- Designed an **Admin Dashboard** for CRUD operations, improving catalog management time by 40
- Deployed on Vercel; optimized React with code-splitting to reduce load time by 28

Fleet.ai – AI SaaS Platform (Next.js, Neon PostgreSQL, Google Gemini API) — Jun 2025

- Built subscription-based SaaS with Clerk authentication and premium feature gating.
- Integrated AI services: article/blog generators, image editing (object removal, background remover), resume analyzer.
- Leveraged Neon Serverless PostgreSQL for scalable, cost-efficient DB layer.

LeafyLane – Grocery Delivery Web App (React, Node.js, Express, MongoDB) — Oct 2025

- Built full authentication (sign-up/login/profile edit) and cart/checkout system with real-time order tracking.
- Implemented **Seller and Admin panels** for product and order management.
- Enabled 24/7 order processing with always uptime on deployed environment.
